

LIPPMANN®

WASHING

Lippmann offers a suite of washing and classifying products across multiple applications, with a full range of mobile, modular and static material and mineral washing equipment. Lippmann's washing system range delivers significant advantages to customers, including lower cost of ownership, lower cost of production, and making more projects viable for their business.

WASH PLANTS ▶ Due to their modular and easily customizable design, the Lippmann wash plants are perfectly suited to the majority of washing applications. With its innovative design, the plant size has been kept to a minimum, while maximizing access to serviceable areas. Its unique features deliver exceptional results with minimal maintenance required.

SAND PLANTS ▶ Lippmann's compact sand plants are modular sand recovery units which are designed to be both cost and energy efficient. The cyclone(s) remove clays, silts and slime from sand and bring it into specification.

SAND SCREW ▶ The Lippmann Sand Screw offers a low cost solution to sand / fines recovery after rinsing and passing through a washing screen. The Sand Screw can be used in conjunction with a static and mobile washing screens to effectively recover and dewater washed sand.

MOBILE RINSER ▶ Available as a tracked or wheeled unit, mobile rinsers come complete with up to 3 side conveyors and split catch box for up to 4 grades of aggregates and 2 grades of sand. The fast set up and relocation abilities make them ideal for contractors and rental fleets. As two machines in one, the mobile rinsers can be easily converted to dry screen mode.
