# Portable Screen Plant

## L820s

The L820s screen plant features the 8' x 20' (2.44m x 6.10m) screen, along with a flex shaft screen drive and cross conveyors or front chute, making it the leader in the market. Wide conveyor belts make it easy to handle any application while improving production and reducing the bottlenecks in crushing circuits.

AR Replacable wear liners on discharge chute

Manual blending gate access in 1/4 increments

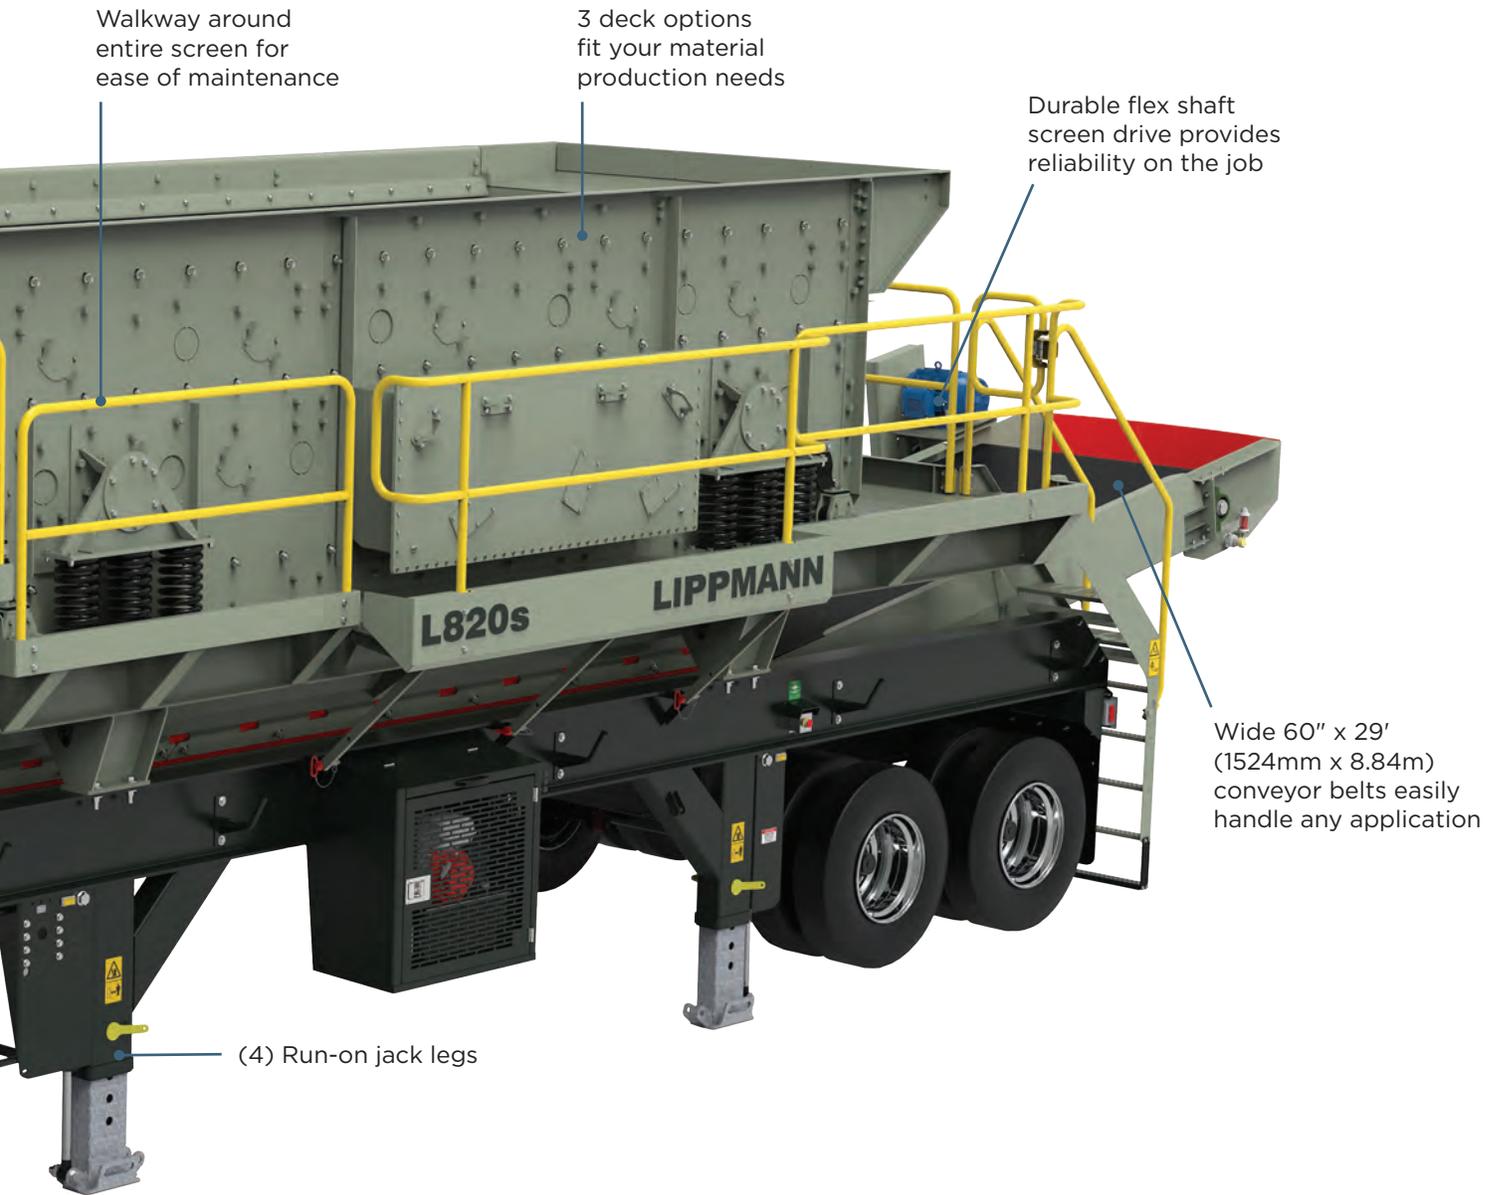

30"x10'6" (762mm x 3.20m) cross conveyors support multiple finished product sizes

### STANDARD FEATURES

- Triple shaft screen
- Oil bath system
- Roll away chute
- Blending gates
- Motorized head pulleys for easy setup and maintenance
- Hydraulic jack legs
- Hydraulic adjustable conveyors

Hydraulic adjustable conveyors coupled with an underscreen belt make this screen plant ideal for any application.

The L820s is set up with flop gates for ease of product blending.

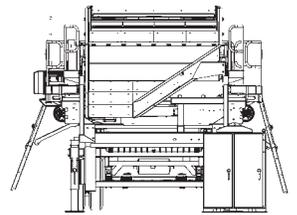

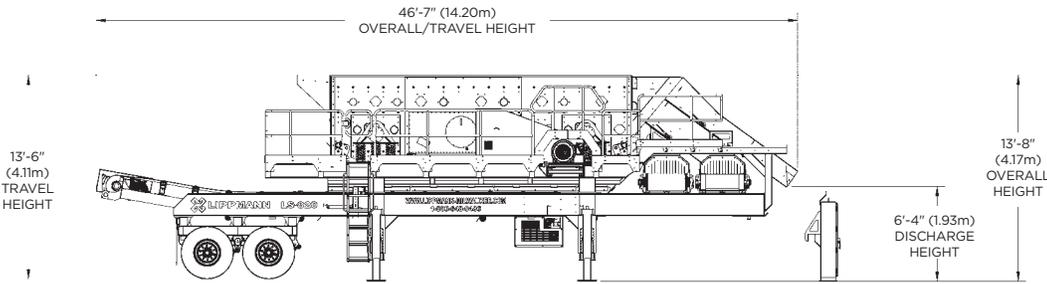

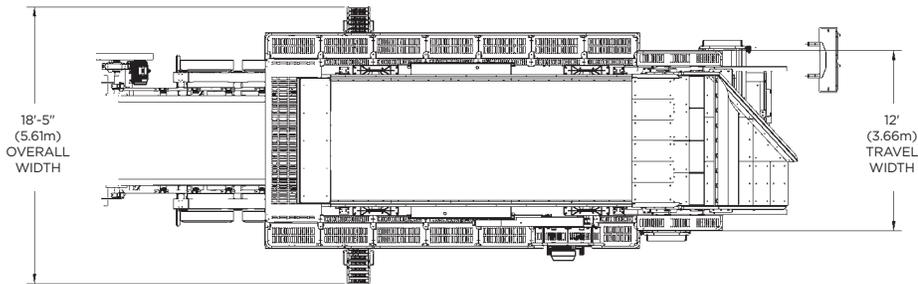

Roll away chutes allow for easy maintenance of the screen and the changing of screen cloth.
